N NOVOGATE

STEEL GATES

Built to Last

What is NOVOGATE?

NOVOGATE offers a practical, durable and attractive alternative to traditional timber gates.

NOVOGATE is an integral part of a property, creating a physical barrier between public and private areas, maintaining both privacy and security.

Strong and Secure

NOVOGATE is manufactured using Magnelis® steel as standard.

This revolutionary material offers an industry leading level of corrosion resistance, meaning a 10 year warranty applies in most locations when supported with basic maintenance.

Finished in a Polyester Powder Coating in a choice of colours, NOVOGATE is a practical and cost effective solution, offering a long lifespan and attractive appearance.

Applications

NOVOGATE is ideal for any application requiring a secure, long lasting and stylish solution such as front or rear garden paths, entrances, access points and driveways with a suitable structure to either side.

The hard wearing and low maintenance properties of NOVOGATE means that they're particularly beneficial for installations where upkeep needs to be kept to a minimum, for example social housing; student accommodation; rented properties, or retirement, assisted or shared living accommodation.

We can also manufacture double gates for larger and more open areas.

Security & Style

Availability

NOVOGATE is available in a selection of standard sizes to suit varying structural openings, either 900mm or 1000mm wide, and in a frame height of 1200mm, 1600mm or 2100mm.

These items come with installation posts and are available with an incredible lead time of just 15 working days.

Hardware Choices

1200mm high will be supplied with a gate latch as standard, with a mortice lock for gates over 1200mm.

We offer a choice of either matt black or stainless steel hardware to suit your preferences, and this covers all aspects – handles, latches, escutcheons and hinges.

Bespoke Choices

Looking for something a little different?

We can also manufacture gates to custom sizes on request to ensure the perfect fit (extended lead time applies).

Specification

Why choose NOVOGATE?

Long lasting and low maintenance, our corrosion resistant steel gates require less upkeep and provide a longer lifespan than traditional timber alternatives, providing security and reassurance without compromising on style.

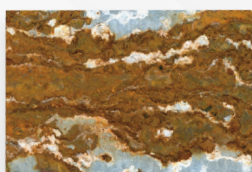

NOVOGATE is a durable, low-maintenance steel gate designed to last. Manufactured using Magnelis® steel as standard, our steel gate resists corrosion for much longer than standard galvanised products, which is reflected in our unrivalled 10 years anti-corrosion warranty.

About MAGNELIS®

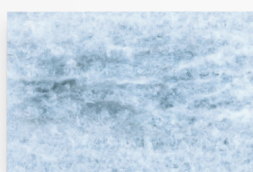

Magnelis® is a game – changer in the world of metallic coating, offering unparalleled corrosion protection. It is manufactured using a continuous hot-dip galvanised process, where it is immersed in a unique molten bath composed of zinc, 3.5% aluminium and 3% magnesium, giving its distinctive chemical properties.

This metallic coating forms a very dense, stable, and durable layer of protection, which prevents the underlying steel from encountering the ambient environment. It therefore gives all shaped steel the same level of protection as flat surfaces.

By comparing Magnelis® alongside galvanised steel, from our 1000-hour salt spray test, the results clearly exposed that Magnelis® resists corrosion for much longer than standard galvanised products, which is reflected in our unrivalled 10-year anti-corrosion warranty.
